

CEC Meeting December 16th 7 pm Community Room at Town Hall
Committee Members in attendance – Rob Fendrick, Town Liaison - Kelly Jasinski.

Streetlights

National Grid quote for the purchase or conversion of the cobra head streetlights is in. It is not what was expected and is over the base price that we believe should be quoted. CDRCP agrees with our assessment of this.

A request has been put out to National Grid to see if this quote is negotiable. There remains also the way to incorporate a new light into the bid/process. National Grid is also looking into if they can add one new light to the bid price.

Real Term energy has gotten back to Rob with an updated quote based on the new numbers from National Grid. It lengthens the amount of time needed to pay back the cost of purchase and installation.

Demand Response

A brief blurb was put out on the town website for the National Grid Black Friday sale for smart thermostats. In order to get credit in the Clean Energies Leadership Round, 10 residents will need to install smart thermostats into their home. More work needs to be done for this community campaign to inform the public.

Next meeting to be determined in the new year.
